

Join our growing Sheffield Landscape Architecture team!

Principal or Associate Landscape Architect

Swipe to find out more

More about the job!

Enzygo are looking for a Principal or Associate Landscape Architect in a senior leadership role responsible to manage high-level landscape design/planning, and multidisciplinary project teams, as well as securing new business. They would need to act as the primary design authority, bridging conceptual planning with practical delivery while mentoring junior staff and guiding strategic division goals.

Core Responsibilities:

- **Project Leadership:** Spearhead complex landscape design and planning projects from the initial brief through to completion.
- **Design and Technical Direction:** Review and approve conceptual designs, masterplans, detailed construction documentation, to ensure quality and compliance.
- **Planning and Assessment:** Lead critical Landscape and Visual Impact Assessments (LVIA) and navigate complex environmental or planning legislations, such as Biodiversity Net Gain (BNG).
- **Client and Stakeholder Management:** Act as the lead client contact, run stakeholder workshops, present design proposals, and represent the firm at planning inquiries.
- **Team Mentorship:** Supervise, mentor, and allocate resources across the landscape team, fostering a culture of technical excellence.
- **Business Development:** Identify opportunities for new business, support bid preparations, and expand the firm's client base.

Key Requirements & Qualifications:

- **Chartership:** A Chartered Member of the Landscape Institute (CMLI) or equivalent, often with several years of post-chartership experience.
- **Software Proficiency:** Advanced skills in industry-standard design tools (AutoCAD, Adobe Creative Cloud) with 3D or BIM-compliant platforms (Revit, Civil 3D) an advantage if not essential.
- **Commercial Acumen:** Proven track record of financial control, budget management, and delivering projects on schedule.
- **Regulatory Knowledge:** Deep understanding of the UK planning system, building regulations, and environmental impact guidelines.
